EXAMINER'S AMENDMENT

Election/Restrictions

Claims 1 and 14 are allowable. The restriction requirement between Species I-X, as set forth in the Office action mailed on 16 November 2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 6-13, 18-24, and 26-28, directed to non-elected species are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claims 25 and 29, directed to species which do not require the limitations of claim 14 are withdrawn from consideration because they do not require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen Kenny on 06 February 2009.

The application has been amended as follows:

Claims 25 and 29 have been cancelled.

Claim 19, line 2, "said cover" should appear —said cover member—

Claim 23, line 2, "said stile member" should appear —said replaceable stile member--.

Replace claims 1-3, 6, 8, 10, 12, 14-16, 18, and 22-23 with their respective amended claims below.

Claim 1:

Edge construction for a door, the door having a first edge and a second edge, the edge construction comprising:

a core member;

a first stile member permanently attached to the core member;

Art Unit: 3635

a replaceable stile member removably attached to the first stile member, the replaceable stile member comprising a straight member having an outer surface, first and second opposing longitudinal inner edges and a longitudinal extending tapered spline, each longitudinal inner edge having a gap;

a cover attached to the replaceable stile member, the cover including first and second opposing flanges disposed on the replaceable stile such that the first and second opposing flanges are disposed in the gaps located between the first stile member and the replaceable stile member.

Claim 2:

The door edge construction of claim 1, wherein said longitudinally extending tapered spline of said replaceable stile member is removably attached to the first stile member by a tongue and groove connection.

Claim 3:

The door edge construction of claim 2 wherein said tongue and groove connection extends along an entire length of the replaceable stile member and the first stile member.

Claim 6:

Art Unit: 3635

The door edge construction of claim 4 further comprising a strip of intumescent material extending the length of said replaceable stile member between said replaceable stile member and said cover.

Claim 8:

The door edge construction of claim 4 wherein the opposing flanges of said cover are spaced from said first stile member, leaving exposed strips on the outer surface of said replaceable stile member between said first stile member and said cover.

Claim 10:

The door edge construction of claim 4 wherein the opposing flanges of said cover are spaced from said first stile member, and further comprising:

slots formed on both sides of said replaceable stile member in the spaces between said cover and said first stile member, and
strips of material in said slots.

Claim 12:

The door edge construction of claim 4 further comprising a strip of material sandwiched between said first stile member and said replaceable stile member, said strip of material having exposed edges disposed between said cover and said first stile member.

Art Unit: 3635

Claim 14:

A rectangular door having vertical and horizontal edges, and a replaceable edge construction along the vertical edge of the door comprising:

a core member;

a first stile member permanently attached to said core member forming a vertical edge of the door, the first stile member having a longitudinal groove extending along the length thereof;

a separate replaceable stile member disposed adjacent and exterior to the first stile member and having a length substantially the same as the vertical edge, the replaceable stile member having a longitudinal spline matingly engaged to the groove of the first stile member to form a tongue-and-groove connection between the first stile member and the separate replaceable stile member and opposing longitudinal inner edges each having a longitudinal gap,

a cover member disposed over an outer surface of said replaceable stile member, the cover member having first and second flanges disposed in the gap of each of the opposing longitudinal inner edges of the stile member defined between the first stile member and the separate replaceable stile member.

Claim 15:

The door of claim 14 further comprising removable fastening means releasably securing said replaceable stile member to said first stile member.

Art Unit: 3635

Claim 16:

The door of claim 14 wherein said cover member is formed of a resilient material shaped to conform to the outer surface of said replaceable stile member.

Claim 18:

The door of claim 14 wherein slots are disposed inwardly of the surface of said replaceable stile member abutting said first stile member, leaving strips on either side of said stile member exposed.

Claim 22:

The door of claim 14 further comprising an additional member sandwiched between said first stile member and said replaceable stile member with its outer edge exposed between said first stile member and said cover member, said outer edges of said additional member being of a color different than the colors of said cover member and of the remainder of said door.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose a door formed from a core having a permanent stile member as well as an exterior replaceable stile member. This

Art Unit: 3635

formation in combination with a cover member which covers the exterior stile member and is received in gaps formed between the exterior stile member and the permanent stile member. Also the combination of the above structure combined with the tongue and groove connection of the stile members is not disclosed in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
